

Nanotechnology for businesses
Friday, 14 March 2008

– **9.30 Workshop “Nanotechnology for the market”**

Technology Transfer is often a way to introduce innovative technologies in the market and to bridge the gaps between research centres and the business community. In this session well known research centres from Canada, Israel, Germany, France and Italy will present their experiences of successful collaboration with industrial partners. Specific cases of nanotechnology applications and products that have reached the market, starting from research labs, will be shared with the audience.

Welcome addresses

Giorgio Simonetto, Veneto Innovazione

Presentations

The session will be moderated by **Anastasia Constantinou** (HELP-FORWARD Network -PRAXI), chairperson of the IRC Nano & Microtechnology thematic group.

ITALY

Nicola Trevisan, Veneto Nanotech

GERMANY

Harald Pötter, Fraunhofer IZM

FRANCE

Nicolas Leterrier, Minatec Grenoble

ISRAEL

Dan Vilenski, Israeli National Nanotechnology Initiative

CANADA

Pierre Lapointe, INRS - Laboratoire de micro et de nanofabrication

– **11.30 Brokerage Event “NanoTec in Venice”**

Through direct meetings it intends to provide European enterprises, universities and research centres with the possibility to meet potential partners for product development, exploitation of research results, manufacturing and licensing agreements, joint ventures or similar partnerships. More than 160 meetings are scheduled between the registered participants.
